<http://image.sciencenet.cn/home/201805/17/222049e2d7zl88dlznm7.jpg>

A schematic diagram of the protein structure of the C-terminal domain of the human p70 S6 kinase. The protein is represented as a horizontal bar divided into segments. Above the bar, specific residues are labeled: two '+' signs, followed by 'F', 'pH', '+', 'D', 'E', 'I', 'N', 'Y', 'K', 'T', 'F', 'pH', and 'H'. Below the bar, there are several vertical tick marks indicating structural features or domains.
